

# AMIN YOUSEFI ADL

FULL-STACK DEVELOPER

+90 537 039 0137

amin@aminyousefiadl.com

<https://www.linkedin.com/in/aminyousefiadl/>

Turkey

## Education

### Bachelor's degree, Computer Hardware Engineering

University of Tabriz

September 2011– August 2015

## Skills

HTML/HTML5/CSS/CSS3

SASS/SCSS/Styled Components

JavaScript/TypeScript/ES6/Rollup/Webpack

React/NextJS/Create-React-App/Gatsby/Vite

Redux/Thunk/Saga/Redux-Toolkit/RTK Query

Hooks/Context API/Refs/HOC/Zustand

Bootstrap/Material UI/Tailwind

Node.js/Express/Rest API/GraphQL

Postman/Swagger/Insomnia

Jira / Trello / Azure DevOps

MongoDb / PostgreSQL / Redis

Strapi / Storyblok / Sanity

NginX/Linux/Dockers/Containers/Kubernetes

Jest, Vitest, Enzyme, Storybook, Testing Library

Testing/Jest/Testing-Library/Enzyme

Code Pipeline/ElasticbeanStalk

Git/GitHub/GitHub Actions/GitLab

Firebase

React Native/Router

## Summary

Hi, I'm **Amin**, a software engineer with **7 years** of extensive experience across diverse industries and tech stacks. My expertise lies in **web development**, with a strong focus on **JavaScript**. I've had the opportunity to collaborate with numerous companies, providing me with deep familiarity in all **phases of the web development life cycle**—from initial architecture to deployment. I leverage cutting-edge web technologies, systems, and methodologies to enhance solution quality and deliver exceptional user experiences. Additionally, I excel in building strong professional relationships and communicating effectively with both team members and users.

## Work Experience

### Freelance Web Developer

Nov 2017 – Present

- **Designed efficient, scalable, and maintainable** software architectures tailored to diverse client requirements, leveraging modern frameworks like **React, Next.js, and TypeScript**.
- **Enhanced performance and reduced load times** by optimizing frontend and backend architectures, employing techniques such as **lazy-loading, caching, reusable components, and Docker containerization**.
- **Improved SEO and responsiveness** by implementing pixel-perfect, browser-compatible designs using SASS, Flexbox, Grid systems, and media queries.
- **Applied TDD methodologies** to improve code quality, minimize bugs, and ensure maintainable development processes.
- Created **CI/CD pipelines** using **GitHub Actions**, AWS services (Elastic Beanstalk, CodePipeline, S3), and custom Linux environments, streamlining deployment and integration workflows.
- **Automated systems** to boost operational efficiency, including a CRM system and sales platforms built with the **MERN** stack, resulting in up to a 70% reduction in response times and 400% user interaction increases via mobile applications.
- **Led full-stack projects** such as multilingual real estate applications and decentralized learning platforms, utilizing technologies like MongoDB, Meteor.js, and Docker.
- **Revamped legacy** applications by migrating from monolithic architectures to modern, decoupled frameworks, incorporating tools like Express.js, Styled Components, and Mongoose.
- **Directed teams** in delivering robust features, such as real-time updates via dynamic admin panels and advanced **search algorithms integrating Atlas MongoDB, Search Functions, and Triggers**.
- Championed scalable solutions for certification systems and dashboard revamps, driving cross-functional collaboration and **mentorship of junior developers**.
- **Boosted partner engagement** by 200% through innovative systems, reducing downtime to under 1% by deploying decoupled containerized solutions.
- **Conducted multiple rounds of technical interviews to evaluate and hire** mid-level, senior, and lead developers, ensuring team growth and alignment with project requirements.
