## FULL STACK DEVELOPER

Experienced Full-Stack Developer with **7+ years** of expertise in designing scalable web applications and optimizing performance using cutting-edge technologies. Proficient in **JavaScript frameworks** like React, Node.js, and TypeScript. Demonstrated ability to lead teams, mentor developers, and implement CI/CD pipelines to streamline operations. Committed to delivering exceptional user experiences and achieving business objectives through innovation and collaboration.

## TECHNICAL SKILLS

### Frontend Development

- Languages & Frameworks: HTML5, CSS3, SASS/SCSS, **JavaScript** (ES6+), **TypeScript**
- Libraries & Tools: **React**, **Next.js**, Material UI, **TailwindCSS**, Styled Components, Bootstrap, Redux/Thunk/Saga/Redux-Toolkit, RTK Query, Hooks/Context API/Refs/HOC/Zustand, React Native
- Performance Optimization: Lazy loading, React.memo, browser compatibility, pixel-perfect designs

### Backend Development

- Core Technologies: **Node.js**, Express.js, Sequelize, GraphQL, **REST APIs**, Nestjs
- Databases: PostgreSQL, **MongoDB**, Redis
- Performance & Scalability: Caching, API integration (Axios), microservices architecture
- AI & NLP Integration: ChatGPT API, OpenAI API

### DevOps & Cloud

- Cloud Services: **AWS** (EC2/ELB, S3/Cloudfront, ECS/ECR, Lambda, Route53, CloudWatch, SNS, SQS, CodePipeline, Elastic Beanstalk, Amplify, RDS)
- Containerization & Orchestration: **Docker**, Kubernetes, Nginx
- CI/CD: AWS Elastic Beanstalk, Jenkins, GitLab CI/CD pipelines

### Testing & Debugging

- Testing Frameworks: Jest, Vitest, Enzyme, Storybook, Testing Library
- Quality Assurance: TDD methodologies, debugging, and code maintainability

### Project Management Tools

- **Git**, GitHub/GitHub Actions, GitLab, Jira, Trello, Azure DevOps

### Other Technologies

- Webpack, Gatsby, Create React App, Firebase, Vite, Strapi, Sanity, Rollup, Postman, Swagger, Insomnia

## PROFESSIONAL EXPERIENCE

### Proxify

Full Stack Developer | January 2023 – Present

#### Accomplishments:

- **Designed scalable software architectures using React, Next.js, and TypeScript.**
- **Optimized application performance with techniques like lazy loading and React.memo, reducing load times by 30%.**
- **Revamped legacy applications by migrating from monolithic architectures to modern, decoupled frameworks.**
- Improved SEO and responsiveness by implementing pixel-perfect, browser-compatible designs using SASS, Flexbox, Grid systems, and media queries.
- Integrated RESTful APIs using Axios, enabling seamless client-server communication and efficient data retrieval.
- Deployed the application using AWS ECS/ECR for container orchestration and image management.
- Configured and managed CloudFront for efficient content delivery and reduced latency across global regions.
- Set up and monitored application performance on AWS CloudWatch, ensuring high availability and performance.
- Developed reusable components and modules to streamline the development process for other teams.

## Generalabs

Full Stack Developer | February 2021 – January 2023

Accomplishments:

- **Built and maintained core web application features using React.js, TailwindCSS, and TypeScript, ensuring robust and scalable solutions.**
- **Integrated GraphQL APIs to streamline data fetching, reducing client-server latency by 15%.**
- **Implemented CI/CD pipelines with AWS Elastic Beanstalk and Docker, increasing deployment efficiency by 40%.**
- Enhanced performance and reduced load times by optimizing frontend and backend architectures, employing techniques such as lazy loading, caching, reusable components, and Docker containerization.
- Worked closely with designers and product managers to implement feature requests that were aligned with user needs and business goals.
- Directed teams in delivering robust features, such as real-time updates via dynamic admin panels and advanced search algorithms integrating Atlas MongoDB, Search Functions, and Triggers.
- Championed scalable solutions for certification systems and dashboard revamps, driving cross-functional collaboration and mentorship of junior developers.
- Applied Test-Driven Development methodologies to improve code quality, minimize bugs, and ensure maintainable development processes.

## Emineller Group

Full Stack Developer | August 2020 – February 2021

Accomplishments:

- **Enhanced UI performance using responsive design and caching, reducing load times by 25%.**
- **Boosted partner engagement by 200% through innovative systems, reducing downtime to under 1% by deploying decoupled containerized solutions.**
- **Automated systems to boost operational efficiency, resulting in up to a 70% reduction in response times and 400% user interaction increases via mobile applications.**
- Set up and configured virtual machines to host containerized applications, ensuring secure and reliable deployments.
- Designed and developed responsive, interactive user interfaces using React.js, Next.js, and TypeScript, ensuring a seamless user experience across devices and browsers.
- Used Docker and Docker Compose to boot multiple microservices, streamlining application management and improving system scalability.
- Configured Nginx for load balancing and securing traffic routing across services.
- Managed containerized applications using Docker, increasing system scalability.
- Conducted multiple rounds of technical interviews to evaluate and hire mid-level, senior, and lead developers, ensuring team growth and alignment with project requirements.

---

## EDUCATION

### University of Tabriz

Bachelor's in Computer Hardware Engineering | September 2011 – August 2015
